INSTALLATION GUIDE

This document outlines the necessary prerequisites and steps for an adequate installation of the SeatSwift software suite, which is composed of two software applications: the management software, to be installed directly on a workstation for the employees of CCHIC Theatre, and the self-service kiosk software, to be installed on a recommended 4:3 screen, as outlined in the Technical Specification.

PREREQUISITES REQUIRED SOFTWARE

- No additional software is required for the installation of both applications.

REQUIRED CONFIGURATION

- A recent version of Windows (7 or later).
- A MySQL database.
- Follow the recommendations included in the installation guide's specifications.

INSTALLATION

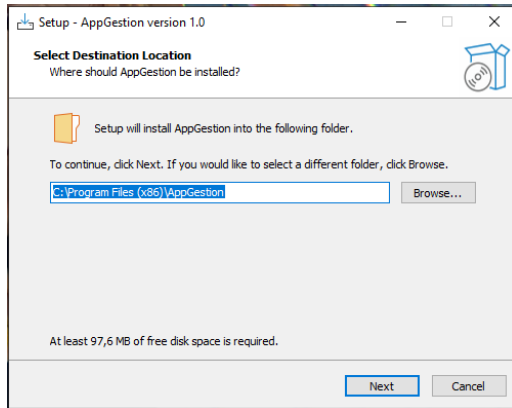

Start by launching the BD Creation script in a "SSDB".

Then, launch the creation script of the CCHIC Theater and their seats.

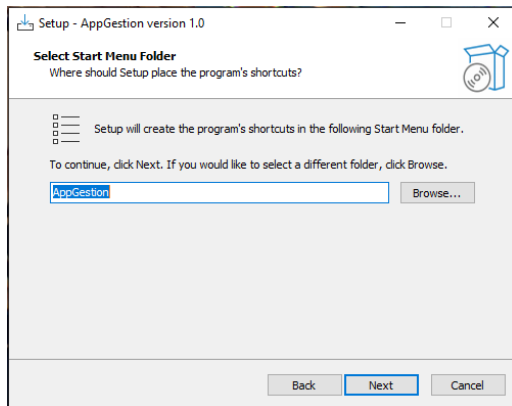

An installation package is included with the package sent by MiCorp, making the installation straightforward and efficient:

MANAGEMENT APPLICATION

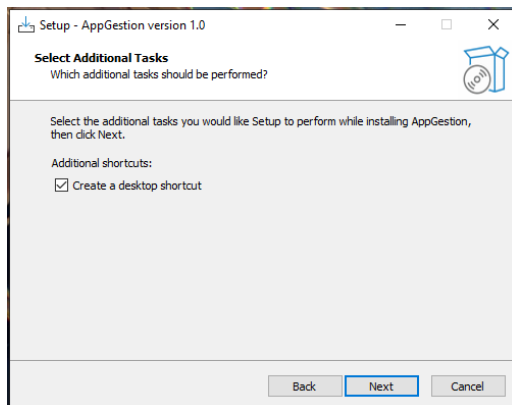

1. Launch the installation software.
2. Accept administrative rights if requested.
3. Choose the installation folder.

4. Select the name of your application in the Start menu.

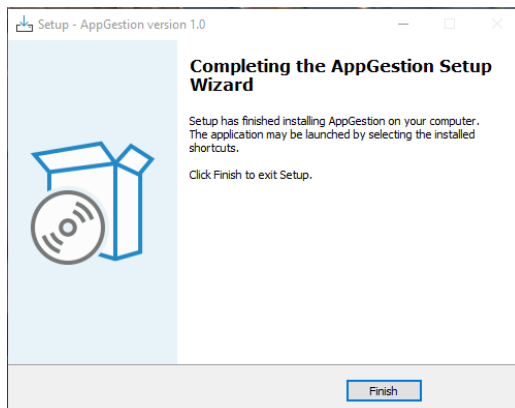

5. Check or uncheck the box for creating a desktop shortcut.

6. Click on "Install" and wait.

7. Then click on "Finish".

8. Double-click on the application icon to launch it.

9. If no administrator user has been created in the database, an administrator account will automatically be created with the username "admin" and the password "admin". You can directly log in to the application using these credentials.

The screenshot shows a web browser window with the title "Connexion" in the top-left corner. The main content area is light gray and contains the "SeatSwift" logo, which consists of a green square icon with a white 'S' and the text "SeatSwift" in bold. Below the logo is the text "Managing App". There are two input fields: the first is labeled "Numéro d'employée :" and contains the text "admin"; the second is labeled "Mot de passe :" and contains five dots. Below these fields is a green button with the text "Connexion" in white. A small "x" icon is visible in the top-right corner of the browser window.

SELF-SERVICE KIOSK APPLICATION

1. Follow the same step than for the managing application until #8.
2. Double-click on the application icon to launch it.

3. Once in the application, you can create an account with your credentials.
